> Description of Chapultepec.-Chapultepec have been captured by the Americans, after the most desperate resistance ever made by the Mexican army, the following account of that place cannot fail to prove interesting: Chapultepec is the Aztec for "Grasshop-

per's Hill." It is an prophetic rock, rising near the former margin of the lake that surounded the city of Mexico, and is one of the places designated by the Aztecs where they tarried on their emigration from the north in search of a final resting place. Their oracles had foretold that such a resting place would be denoted by their seeing an eagle devouring serpent on a rock, and at Chapultepec this orediction was verified. From it they beheld he eagle on one of the rocks in the lake, deouring a serpent. The event was at once ymbolized on the flag and coin of the nation. The hill is surrounded by a belt of noble cypress trees, one of which, known as Monteuma's cypress, from having been planted before or during the reign of that Prince, measares fifty-one feet in circumference.

Chapultepec was the favorite country resi lence of Montezumas and his courtiers. It contains remains of gardens, groves, tanks and grottos, which bear evidences of its past magnificence. Here Montezumas rerired from the heat and dust of the city, to enjoy all the luxuries that wealth and power could procure, or art devise. It was selected by the Spanish Viceroy as the most beautiful place in the valley of Mexico for a royal residence, and the modern palace (lately a military school) was

"The President, by and with the consen of the Senate, has appointed commissioners to treat with the Cherokees, and I believe the object of the treaty is to purchase them out it they will sell—at any rate to extend the line to the Tennessee river. I hope this may be effected. No news that can be relied on from our commissioners at Paris; but it is reported, and I believe on good authority, that they are returning without being admitted. What may be the consequence, I am not prepared to say but I am certain France will not declare war against us: but there are a number in Congress, and to their strength I may add the Heads of Departments, that have a wish to declare war against that nation; or, in other words, do such acts as would in their consequences be similar to a declaration of war. I expect the return of our commissioners (if the report is true) will bring before us questions of the las importance to our Government-questions that will involve in themselves war or peace; and from the spirit that has this day displayed itself on the floor of the House of Representatives, I can assure you that I do not expect much moderation in the discussion of these important questions. There are one side that blame the administration for our present disaity for Britain has too evidently appeared from a negro boy he had in charge—and a very Mr. Monroe's publication—that partiality has lately appeared still stronger, but in different colors. In order to carry into effect the measures of the administration, they have fallen on a plan to remove from office every man who professes republican principles, and fill those offices with men who will bend to the nod of the Executive. This is not mere conjecture, but it is openly avowed by heads of departments, to be the rule lately established by the Executive, and this day openly avow ed on the floor of Congress and attempted to be justified; therefore, the talents, virtues, or

abilities of men, are no recommendation to bring them into office, if they do not think exactly with the Executive. This is sweet reward for seven years' servitude to obtain freedom; and if a man cannot be led to believe as the President believes in politics, (and God forbid they should,) he is not to fill an office in the United States. This, sir, I view as more dangerous than the establishment of religion; for it is truly an attempt to establish politics, and to take away the wright of thinking. This, sir, will open the eyes of the A issue, and it will shortly be determined.

It will be seen from the following general orders of the Commander-in-Chief of the American army, and also from Gen. Quitman, civil and military Governor of the city of Mexico, that the most efficient, and at the same time, the most prudent and bonorable measures to ensure the full and complete subjugation of the capital of Mexico have been adopted. We publish such of the orders as we think will interest the reader:

From the New Orleans Picarupe. GENERAL ARMY ORDERS.

On the 17th of September, Gen. Scott retial law in places occupied by our troops, with important additions. From these orders we orous measure put in force:

14. For the ease and safety of both parties, in all cities and towns occupied by the Amerpolice of the said forces.

15. This splendid capital-its churches and religious worship; its convents and monastefaith and honor of the American army.

16. In consideration of the foregoing pro tection, a contribution of \$150,000 is imposed on this capital, to be paid in four weeks instalments of thirty-seven thousand five hundred dollars (\$37,500) each, beginning on on Monday, the 11th of October.

to be taken from the city.

Another order of Gen Q. allows the collection of customs and duties at the gates of the city as usual, save on supplies for 'he Quartermaster's and Commissary's Department. The proceeds are to be appropriated in the first instance to city expenses, and the residue as the general may afterwards direct.

The following orders of Gen. Scott point to humanity and care for his troops: GENERAL ORDERS-No. 296. HEADQUARTERS OF THE ARMY,)

Mexico, Sept 22, 1847 The general-in-chief has received, through many kind sources, Mexican and others, undoubted information that an extensive conspi racy is on foot about us, to surprise (by means of an insurrection) our guards and quarters and to murder our officers and men.

IMPORTANT INVENTION

We learn from the Hagerstown Torchlight that Mr. Samuel Bentz, of Boor Md., has discovered a process, which is now being patented, which, it is asserted, comoletely removes all bran and extraneous mater from wheat in its natural state, leaving the grain nothing but pure unground flour, effectng a saving or gain of at least one-tenth. The editor adds:—(Charleston Mercury.

The outer coating of the grain is completely removed, and instead of sixty-one pounds of offal, (or one bushel of wheat to the barrel,) the offal, under this system, will not exceed from seven to twelve pounds; and while from twenty-five to fifty per cent. of time is saved in the grinding, the varieties of wheat are improved from five to fifteen per cent, produmissing. Those are reported as missing who cing the best hot climate flour known in the did not appear in their respective companies world. These results have been arrived at by actual experiment, and the public can thus see at a glance the immense importance of the improvement. The cultivation of millions of additional acres could not benefit the world more than this single, and as we are told, truly simple invention. We have a specimen of the unbranned wheat, which we will take pleasure in showing to any one who may wish to examine it. A specimen was prepared for the New York Fair, which has elicited the following highly complimentary letter:

N. Y. STATE AGRICULTURAL SOCIETY. ALBANY, Sept 25, 1847. S. Bentz: Your letter enclosing samples of wheat, &c, with your notice as to the improvement, was received too late to be passed upon by the Judges at the Fair, but has been carefully examined by the executive committee, and they are impressed with its great value to the wheat growing districts of our State. We are desirous of ascertaining the process by which it is accomplishe, the expense attending it, and whether it can be done fast enough, so as to supp y a run of stone for grinding. We have awarded you a diploma. which is herewith enclosed. I should be pleased to have you send me by express a larger sample of wheat and also of bran-say 2 quarts. We are desirous to ascertain all we I am, respectfully yours, tant.

Sad Case-A Wounded Soldier .- A man named Scammon, belonging to Maine, has ar-

rived at Boston, who is thus described by a letter writer: This afternoon saw one of the most pitiful objects that ever lived-a man breathing through an apperture in his wind-pipe, about aperture was made by a musket ball, in Mexico, in one of the late battles. He scarcely neither read nor write. He could hear distinctly and make signs to convey his meaning, He tried hard to speak so as to be heard, but the volume of breath necessary to form a word or sentence, passed out of the wind pipe at prevented articulation. This aperture had healed, and a silver tube was inserted to assist respiration, which was performed with great difficulty. This tube was attached to his neck by a string. He had also been wounded in one of his legs.

"Nevertheless, gentlemen, the war is upon us-our armies are in the field and our navies are on the sea. Our duty as good citizens is plain. WE MUST MAINTAIN THE GOV-ER MENT, AND AID IT IN AN HONOR-ABLE MANNER TO BRING THE WAR TO A SPEEDY TERMINATION. The people demand that every effort shall be made to effect this end. But while war lasts, while our soldiers are on the land and our sailors on the sea to uphold the flag of our country, eve ry means must be adopted to succor and support them. LATER FROM GEN. TAYLOR! His Return to the United States-Gen. Wool.

Specie Trais. Gen. Taylor's Return Home. Or ci will feel a throb of excitement wildom el at the announcement, that Gen. Taylor may possibly be among us in a short time. very foundations of the city.

An officer of the army, twenty-four days from Gen. Taylor's Camp, informs us that Gen. Taylor may be expected here in the course of a week or ten days. He was preparing to leave Walnut Springs when our informant last saw him, and he spoke of his re-turn to the United States freely, and anticipated the pleasure he should have on his cotton farm. He is in good health and spirits.

At Gen. Taylor's camp, when our inform ant left, was the following army: Bragg's battery and the skeleton remains of three com panies of the 3d Dragoons under Col. Fontle roy. At Monterey, there was Col. Tibbatts with five companies of the 16th regiment of Infantry. The city of Monterey, it is said, was under better government, than at any time since under our control.

This little army captures and occupies the enemy's Capital, with its 200,000 citizens, and quietly proceeds to or-

ganize and rule this huge empire. There is no such instance-no such picture of the sublimity of true courage, in all the brilliant annals of man's glorious deeds. The a glorious one. This theme will inspire Poesy, and excite the Muse of History to her loftiest eloquence. The glory of these deeds will brighten with the lapse of time. We envy them the rich legacy of renown and of noble examples, which the present generation of our countrymen will transmit to those

SOUTH CAROLINA AND RAIL ROADS -A writer in the Charleston Mercury, who signs himself ANTI-DEBT, has taken strong grounds against the State's again participating in the construction of Rail Roads. Well, with this. as a North Carolinian, we have nothing properly to do. We are, however, pleased to see that this writer, in speaking of the various schemes projected, thinks that the Manchester Road will carry twice as many passengers as any of the other routes. We are glad that a Charlestonian makes even this admission. We believe that the Wilmington & Manchester Road will carry at least eight times as many passengers per mile as any of the other Roads. From calculations which we have made, and we have taken some pains in making them, we feel assured that the through travel, that is, the great Northern and Southern travel, will, in less than six months after the completion of the work, be at least 50 passengers per day each way. Beyond this, we have every reason to believe that the local travel will equal that on any of the Roads which the Mercury's correspondent enumerates. Indeed. there is no man who knows anything about the geography of the United States, and who is at all acquainted with the Rail Road question as it now exists, and who looks at the Manchester route, but must admit that if there is any scheme of this kind in all the Southern country that can be profitable, it must, from the very force of things, be the Wilmington & Manchester Rail Road. We, the individuals along the line of this contemplated project, have shewn our faith in this scheme, by al-

WHAT WILL THE WHIGS DO ?- We venture

ing portion of the Whig party regret that they have a majority in the next House of Representatives, near about as much as do the Democrats. What will they do? After having denounced the war in every shape and formon the head of Mr. Polk's administration every species of abuse for conducting the war as it has been conducted, they now suddenly, and, we apprehend, contrary to their calculations, find themselves holding the reins of power, so far as the lower branch of Congress is concerned. What will they do with this power? In the language of an able New England cotemporary, the New Haven (Conn.) Register, "What is their position? The federal presses in New England have condemned the war, its origin and objects-denounced the Administration for its reasonable prosecution of it-and very boldly assert that the means for its continuance should be withheld by Congress! And having committed themselves to such a policy, we shall now see whether they are really ready for the moral treason they profess; whether they will dare oppose by their votes the vigorous prosecution of the war, when the responsibility of the matbeen honest in their denunciations, they will ed from Mexico was right; that the murder and imprisonment of American citizens was right; that the invasion of one of the United States, by Mexico, with the avowed purpose bound to protect each State from foreign inva- tion. sion, was wrong! they will vote to withhold supplies from our troops now in the field-and for the country will not sustain a party that assassin's desert—an ignominious death. should take such ground in any controversy with a foreign power-much less in this, will stand convicted of hypocrisy-of trifling impale themselves on either horn of the dilemfallen to the whig party.

He says he has courted death in every shape; that he has been wounded, and that he has had his clothes riddled by the bullets of the "perfidious Yankees." men, and we suppose some of them will believe him, that he has performed prodigies of valor and generalship, but that fortune was his foe. It is really rich; and what adds to the richness of the whole, is, that he "swears" Gen. Alexander McRae. that he will continue to fight the " Northern barbarians till either he is numbered with the dead or they have ceased to pollute the 'ho ly' soil of the republic with their impious Santa Anna is an able and dexterous mana-

NEW YORK AND THE WILMOT PROVISO -Up to this time, we have watched the course of our brethren of the Democratic party at the North, on the all-important slavery question, with unbounded pleasure. The Democrats of Massachusetts, Connecticut, and Maine, in the most authoritative manner, have given the most unequivocal go-by to the doctrines of Wilmot. More recently the Democratic State Convention of the great State of New York, which assembled at Syracuse to nominate State officers, laid on the table a resolution which had for its object the incorporation of the Wilmot Proviso into the political creed of the Democracy of the Empire State. This we looked upon as settling the question. It ems, however, that a portion of the Demoerats of that State are not satisfied with the ominations of the Syracuse Convention .-Most of our readers are aware that the De; nocracy of New York is divided into two grand sections, familiarly known as the "Hunkers" and "Barn-burners." The "Hunkers' carried the day in the Convention, and the Barn-burners" are dissatisfied. The latter propose holding another Convention at Herkimer for the purpose of expressing this dissatisfaction. Now we would not give to this oposed Heikimer Convention such weight, ut that we gather from the organs of the Barn-burners" that its principal object is to esuscitate the slavery question; in a word, to adopt the Wilmot Proviso This we deplore exceedingly, and do trust that the sensible, right-thinking portion of the party in that great State will frown down this attempt to unfortunate division in New York will still hope, that the Democratic party, from Maine to Texas, would plant itself upon the Missouri Compromise. We know that the Whig party at the North has leagued itself with the Abolitionists, but united upon the compromises of the constitution, we feel assured that the Republican party can and will triumph over the united hosts of Federalists and Abolitionists. We do earnestly hope that the Democrats of New York may be able to unite on this allimportant question. Such a union would ensure to the Republican party a triumph in '48, which would even eclipse that of '44. We will not be discouraged. The good sense of the party, and the inherently correct principles of Republicanism, we doubt not will bring

apon the mode and the manner of the termination of the present Mexican war, is being pretty largely indulged in by some of our contemporaries of both parties, and we do not see why we should not put in our oar in this grave question as well as others. When, then, will this war be brought to a close? In what manner will it terminate? These are extremely grave and important questions, and from the present posture of affairs, questions that are very difficult to answer. In our estimation, indeed, we know, that the war was commenced upon our part from the very necessity of the case. We were forced into the contest. We do not believe, however, that there is a single man in the Union who could have dreamed at the commencement of the contest that at this day it could possibly have assumed the aspect which it now presents. The United States of America declared war for the twofold purpose, as we understand the matter, of repelling a foreign nation who had insolently invaded our soil, and of redressing the many grievances which that nation had heaped upon our country during a series of years. We could not suppose but that the war would, long ere this, have been brought to a close. PHILADELPHIA, Oct. 25, 1847. Dear Journal: You have the honor of read-ing my first letter intended for the light; and in criticising it, I hope you, as well as your numerous, and I hope indulgent readers, will bear this in mind. > scurity at her next election. That election is over, how signally those predictions have been recapitulating the vote. You can read it in any of the prints of the day. I may be permitted, however, to give my idea of the reasons why the result was such. The high tariff men went on the ground, that in six months after the low tariff went into operation, the wheel of the factory would cease to revolve: the axe of the shipwright would wax rusty for lack of use; the sail of the merchant-ship would mould from the same cause; the coal and iron mines of Pennsylvania would be dormant : and that all the industry of the land would be blighted as with a plague; that the revenue would dwindle so low, that even our mutual and venerable relation, Uncle Sam, would have no occasion for a breeches pocket; that all our money woul! be drawn from us by that rampant animal, John Bull, Esq ;in fact, that we would be totally ruined. how has it turned out? Why, almost twice as many tons entered and cleared at Philadelphia this last year as ever did in the same time before; the same in other ports; factories of every description are springing up as if by magic all over the country; iron foundries and smelting establishments appear to be growing spontaneously; shipwrights are in such demand, that in this city \$2 50 per day has been paid for them; ships have been built almost without number; in fact, everything has been more prosperous under the new tariff than it ever was before. Well, the Whigs gulled the people with the cry that a low tariff would ruin the country; now the people have seen for themselves. Why the high tariff men insult not only common sense, but the industri

We must at once admit, that we lack the intelligence and the enterprise of the English mechanics. say if, having the raw material cheaper than him-food cheaper and far plentier than himwe cannot manufacture as cheap as him, we to set before us the example of England, in do not deserve protection. But such a view of the case is absurd, and as I said before, insulting. A mechanic myself, and one who has given the thing a great deal of thought. I can safely affirm, without fear of contradiction, that, placed on the same footing, we fear competition from no country on earth. This may seem like a boast, yet I think it is plain truth. With such facts staring them in the face, 'the people will not vote for a party who would enrich a few cotton manufacturers at the expense of a nation. The country's ruined, say he Whigs. Sailors in far distant ports may point to her as a specimen of the unrivalled skill of the American shipwright. She may return home in safety to enrich her owners and gladden the hearts of many families. Or let us look at what may be her fate. On her first voyage she may be cast away; blighting the hopes of many. She may lay her bones on a distant and inhospitable shore. Who can tell her fate? Thus it is with man. In the dawn of youth, or rather manhood, he is launched upon the stormy ocean of the world His destiny may be bright and prosperous; or some of your readers may not have an idea of River, about three miles from the City proper, but now almost joined to it, owing to the rapidity of the builling occasioned by it. The Road consists of two tracks from the Coal region; one for the up trains, consisting of the empty Coal cars and up freights; the other for the down trains, consisting altogether of Coal This Road is said to be one of the best in the country. It certainly sustains a tremen lous amount of travel; as much as 50,000 tons passing over it some weeks; though this is over an average. They use very powerful engines; some of which have brought as much as 500 tons at a load. When the tracks arrive within a short distance of the terminus on the Delaware, they branch into something like twelve or fourteen. Now the River is some 20 or 30 feet lower than the level of the Road some distance above; and the Company, taking advantage of this, have laid the track to the River on a kind of brilges, (the ground

near the River being also lower than the level of the Road.) there is a free communication un ler all these tracks, not only for men, but for vehicles. At intervals along these bridge tracks, there are holes or schutes through which they drop the Coal. To facilitate th s. the Cars are made with moveable hottoms -These they drop out. Underneath are the different Coal yards, owned by different individuals and Companies, but these are only for home consumption. The loading of vesse's s another matter. The reader having seen the elevation of the track, must also see that the hold of the ship in the River must be lower than the track. The vessel is brought along side; her hatches opened; a schute from one of the above mentioned holes in the hottom of the track is placed in one of her hatches; when slap, down goes four or five tons into her hold in less time than you can upset schultes are made of small bars of iron, laid at the distance of about a quarter of an inch, in consequence of which, the fine dust is sifted from the Coal before entering the vessel. Now let the realer consider that these tracks extend into the River on piers: that between each of these piers, several vessels can be loading at once; and that one can load at the end of each pier; and he will at once see the tremendous facilities this place has as a Coal depot. Let him also consider that ships are at all times waiting for a chance to load, and he can form some idea of the awful amount of ruin of a rag round my shoulder; but I couldn't the low tariff has brought on the Coal busi-

WILMINGTON MARKET-Oct. 28.

BACON-Hams continue very scarce. The

stock of Middlings and Shoulders ample, and

prices of the three descriptions firm. Western Bacon-There is a fair stock of this article in store, and sales at 81 a 91c. CORN-We hear of no arrivals worthy of remark. The market seems to be fully sup-

p'ied, and sales dull at quotations. LARD-Very scarce, and quotations main-

tain much firmness. LIME-Received 600 casks, affoat, unsold.

LUMBER -- River -- No sales Flooring Boards. No Wide Boards on the market, and some inquiry for them. Scantling-We hear of no sales.

TIMBER-Last sales Mill Timber as follows :-- common, \$4 50; ordinary to good, \$6 621; and extra good, \$9.

NAVAL STORES.—The unfavorable accounts from Europe and the Northern markets has caused Turpentine to go down, since our last report, to \$2 80. Sales have varied since this day week from \$3 10 a \$3 05, at which we then quoted, to \$3, \$2 95, \$2 90, and \$2 80, and \$2 75 was all that was offered at the time of making up our report this morning. We, however, know of no sales having been effected at the last named figure. Arrivals have been light. In Spirits we hear of no-

thing doing. Tar.-Last sales at \$1 90. PEAS-Ground-sales at \$1 10 a \$1 15 per bushel. Cow - Some small lots sold and

PORK .- Northern Prime inclined upwards. Now quoted at \$14 50 a \$15 per bbl.

SALT-Received 5,200 bushels from Rum Key, and sold, affoat, at 30c. per bushel Also 5.000 bushels from Curacoa,-cargo schr. Aurora, below, wind bound.

SHINGLES-In demand, and sales at \$2 50 a \$3.

STAVES-There is some inquiry for Red Dak Hhd. Staves, and the article, to a limited extent, would command ready sale at a fair FREIGHTS-Have become quite scarce;

30 cents per bbl. coastwise last rates paid; 25 cents is all that is now offered. A large number of vessels below, bound up, and in port, as will be seen from our marine list. FAYETTEVILLE, Oct 23d .- The present has

been quite a duil week, and but little produce of any kind selling; but few changes. Sales of cotton at a decline, 10 to 10 a cts. per lb. Sales of three loads mountain butter. 15 to 174 cents .-Brandy, 40 cents; Whiskey, 30 cents; Corn 45 to 50 cents; Oats 30 cents; Bacon and Lard, 10 cents.-[North Carolinian

CHARLESTON, Oct. 22d. -Cotton 9 to 11 cents Rice \$39 to \$4; Rough do. 84 to 98 cts.; Corn 65 to 70 cents; Flour \$41 to \$61; Bacon, hams 8 to 121, sides 81 to 82, shoulders 8 to 82; Laid 12 to 13; sales at auction of Rio Coffee at 64 cts.

NEW-Your, Oct. 23d .- Noval Stores .- The news from England by the last steamer being less ncouraging, and business there in a very uncertain and unsatisfactory state, some bolders have evinced a desire to realize, and sales of Turpentine have been made at a decline from previous rates; we notice 2000 bbls North County at \$3 371 per 280 lbs; with some smaller parcels at \$3 50. Spirits Turpentine is inactive, and sales are only made in lots as wanted at 49 a 50 cents, cash. Sales have been made of 1300 bhis. Wilmington Rosing at 75 cents, delivered; and 3 a 400 bbls. Tar at \$2 374, which is a little lower

This, we are aware, must appear incredible, but we have letters from physicians and our Agents from all parts of the United States, informing us of extraordinary cures. R. Van Buskirk, Esq., one of the most respectable druggists in Newark, New Jersey, informs us that he can refer to more than one hundred and fifty cases in that place alone. There are thousands of cases in the City of New York, which we will refer to with pleasure, and to men of character well known.

UNITED STATES OFFICER.—Cap'. G. W. McLean, member of the New Jersey Legislature, late of the United States Navy, has kindly sent us the following certificate. It tells its own story:

Rahway, January 25, 1847.

States Navy, has kindly sent us the following certificate. It tells its own story:

Rahway, January 25, 1847.

A year since I was taken with the influenza and my whole system left in a debilitated state. I was induced to try Dr. Townsend's Sarsaparilla, and after taking two or three bottles I was very much relieved, and attributed it entirely to the said Sarsaparilla. I have continued taking it, and find that I improve every day. I believe it saved my life, and would not be without it under any consideration.

The Editor — John Jackson, Esq., Editor of the Rahway Republican, published the above certificate, and remarked in an editorial as follows:

The success of Dr. Townsend's preparation of Sarsaparilla appears to be of the most extraordinary character. We publish to-day two certificates in its behalf, one from Capt. McLean, of this town, and one from Rev. Mr. White, of Staten Island, a gentlemsn well known in Rahway.—Capt. McLean believes the medicine to have saved his life, and Mr. White seems to entertain an equally strong confidence in its efficacy. Intelligent men like these would no praise so s rongly what they did not fully believe to descrive it.

Scrofula Cured.—This certificate was handed in to Dr. Townsend's office this week, and conclusively prove

Dr. Townsend's office this week, and conclusively prove that his Sarsaparilla has perfect control over the most obstinate diseases of the blood. Three persons cured in one house is unprecedented.

THREE CHILDREN. Dr. Townsend—Dear Sir: I have the pleasure to inform you that three of my children have been cured of the Scrofula by the use of your excellent medicine They were afflicted very severely with bad sores; have taken only four botties; it took them away, for which I feel myself under deep obligation. Yours respectfully, 18AAC W. CRAIN, 106 Wooster street.

New York, March 1, 1847.

RHEUMATISM & THE PILES. September 10, 1846.

Dr. Townsend—Dear Sir: My wife has been for seve ny different remedies to obtain some relief, but all to no purpose. She was finally induced, by seeing your advertisement, to give your Sarsaparilla a trial. We procured some of it from your agent (Mr. Van Buskirk) and it gives me pleasure to state that after using it she experienced great relief, and was in a very short time perfectly cured. I was also (together with a man in my employ) badly troubled with piles, and by using a small quantity of your Sarsaparilla, our complaint was completely cured. I consider it one of the best of medicines, and would advise all who are afficient to give it exists. and would advise all who are afflicted to give it a trial GARRIT GARRABRAN

Clergymen and Physicians.—As well as thousands f others in all parts of the United States, are continual-y sending certificates and informing us of the benefits by sending certificates and informing us of the benefits derived from Dr. Townsend's Sarsaparilla.

Dr. Townsend—Sir: Some time since you requested my opinion of the virtues of your compound Syrup of Sarsaparilla; I am now prepared to give it. I have used it in my practice and prescribed it for the last few months, and musi give it my decided preference over a sything of the kind with which I am accuminted both. nything of the kind with which I am acquainted, both as to its medical virtues and the reasonable price a which you sell it. In scrofulous affections, cutaneous eruptions generally, dyspepsia, indigestion, costive habits, and liver complaints, I am much pleased with its effects. In these complaints, or any other where scrofula is indicated, I can with confidence recommend it to he patronage of the profession as a valuable auxiliary for removing diseases in some of its most troublesome forms, and to all, as a safe and valuable medicine. Brooklyn, Nov 21, 1846. BEDJ. WEEKS, M. D. Dr. Townsend—Dear Sir: Having for some time past been afflicted with a pulmonary affection on my lungs, and a continual pain in my side, owing to evening expo-sure in travelling after preaching, and finding my dis-ease to increase, with much difficulty of breathing and

boring under the same difficulties that 1 have been fo some time past. Yours, respectfully, SAM. WHITE, Nov. 22, 1846.] Pastor of Baptist Church, Staten Island ALMOST A MIRACLE. Read the following, and doubt if you can, that consumption cannot be cured. This is only one of the several hundred cases that Townsend's Sarsaparilla has cured:

Brooklyn, Sept. 14, 1840.

Dr. Townsend—Dear Sir: I was taken, a little over a ear ago, with a severe cough and a pain in my side. I acressed on me very fast, indeed. I was pronounced year ago, with a severe cough and a pain in my side. It increased on me very fast, indeed. I was pronounced by physicians to have the quick consumption. I raised large quantities of bad matter, had night sweats, and sinking very fast: my doctor said he could do nothing for me. I went into the hospital in hope of being benefitted, but was pronounced there as incurable. I was now greatly distressed at the lungs and could hardly breathe; I soon became emaciated, and expected to die; was confined to my bed, and was obliged to have watch ers; indeed I cannot give you any description that would do justice to my case. I was supposed by my frjends to be past recovery; I had tried a great number of remedies, and all seemed to be to no purpose. I read of some most extrordinary cures performed by your medicine, and to tell you the truth, I suspected there was some humbug in them. But I was induced to try it; I did so, and am very thankful I did. I cannot say that I am entirely well, but am so far recovered as to be about my business, and hope to be entirely well in a few weeks. My cough and pain in the side, and night sweats have left me, and raise but very little, and an fast gaining my usual strength. I felt it a duty to give you a statement of my case, to publish if you please.

PETER BROWN, 47 Little-street, Brooklyn.

GREAT FEMALE MEDICINE. Dr. Townsend's Sarsaparilla is sovereign and speed cure for incipient consumption, barrenness, leucorrhea, or whites, obstructed or difficult menstruation, incontinence of urine, or involuntary discharge thereof, and tinence of urine, or involuntary discharge thereof, and for the general prostration of the system—no matter whether the result of the inherent causes, or produced by irregularity, illness or accident.

Nothing can be more surprising than its invigorating effects upon the human frame. Persons all weakness and lassitude before taking it, at once become robust and full of energy under its influence. It immediately counteracts the nervelessness of the female frame, which is the great cause of barrenness.

It will not be expected of use in cases of so delicates. It will not be expected of us, in cases of so delicate a nature, to exhibit certificates of cures performed, but we can assure the afflicted that hundreds of cases have been reported to us. Several cases where families have been without children, after using a few bottles of this invaluable medicine, have been blessed with healthy

offsprings.

Dr. Townsend: My wife being greatly distressed by weakness and general debility, and suffering continually by pain and a sensation of bearing down, falling of the womb, and with other difficulties, and having known and the womb, and with other difficulties are great curves, and the womb, and with other difficulties, and having known cases where your medicine has effected great cures, and also hearing it recommended for such cases as I have described, I obtained a bottle of Extract of Sarsaparilla, and followed the directions you gave me. In a short time it removed her complaints and restored her to health. Being grateful for the benefits she received, I take pleasure in thus acknowledging it, & recommending it to the public. M. D. MOORE, cor. of Grand Albany, Aug. 17. 1844.]

Dr. Townsend.—To all whom this may concern: This is to certify, that my wife used one bottle of your Sarsaparilla previous to her confinement, under the most alarming and delicate circumstances, being troubled with the dropsy, swelling of the feet, nervous affections, and very much debilitred. With my persuasion, and the recommendation of those who had used it, she was induced to try it, with little or no faith; and suffice it to say, the medicine had the happy and desired effect, not only in the hours of confinement, but after the expiration of one week of its use, the dropsy and nervous affection gave way to an astonishing degree, and her health is now better than it had been for a long time previous. If this will be of any service to you, or any who doubts the success of the medicine, you are entirely welcome to it. I subscribe myself your most obedient and obliged servant,
